

# AI Security Research OS — Assessment Report

Target: <https://autoappy.com/>

Mode: SAFE | Scan ID: 6cd5fd4f-308a-4833-a032-960da7cceff0

**Overall Risk Score: 0.0 / 10.0**

## Executive Summary

Automated assessment completed. Review tool evidence and findings.

## Vulnerability Findings

| Severity | Finding Title                                             | OWASP Category                 | Verified  |
|----------|-----------------------------------------------------------|--------------------------------|-----------|
| MEDIUM   | Missing Strict-Transport-Security (HSTS) Header           | A02:2021-Cryptographic Failure | POTENTIAL |
| MEDIUM   | Missing Anti-Clickjacking Header (X-Frame-Options)        | A05:2021-Security Misconfigura | POTENTIAL |
| LOW      | Missing MIME Sniffing Protection (X-Content-Type-Options) | A05:2021-Security Misconfigura | POTENTIAL |
| LOW      | Missing Referrer-Policy Header                            | A01:2021-Broken Access Control | POTENTIAL |
| MEDIUM   | Cleartext HTTP Service Exposed (Port 80)                  | A02:2021-Cryptographic Failure | POTENTIAL |

## Remediation Playbook

- Review open ports and exposed services
- Ensure Web Application Firewall is enabled
- Verify Ollama or cloud LLM service is active for AI reasoning

## Reconnaissance Telemetry

Resolved IPs: ['147.79.69.72', '91.108.106.30'] | Open Ports: [80, 443] | Server: hcdn
